CONFERENCE VENUE

Karl-Bröger-Zentrum, 90459 Nuremberg, Karl-Bröger-Straße 9

CONFERENCE FEES — EARLY BIRD PRICES

Two-day conference with evening event on November 06th

Industry delegates	395 €
Institutes / authorities	235 €
Members of the Networks (NanoCarbon, NanoSilber, nanoInk, NanoAnalytik, Nanonetz Bayern e.V.)	235 €
Students	95 €
Students (without conference dinner)	55 €

(Notes: Prices are subject to VAT. The fees include conference documents, coffee breaks, lunch breaks, refreshments and the evening event. For registrations after 01.10.2019 a surcharge of 20 % will be due. In case of withdrawal from 24.10.2019 cancellation fees of 50 % of the respective prices are due. In case of withdrawal from 31.10.2019 full conference fees are due. Organiser: Nanoinitiative Bayern GmbH.)

Nanotechnology**

**HYBRIDE
MATERIALIEN**
NANO GOES MACRO

PROFILE OF THE CONFERENCE

Nano goes Macro was founded in 2017 by the Cluster Nanotechnology and is a cross-industry technology platform for the combination of nano and macro materials, focusing on fiber-reinforced systems.

The conference **Hybrid Materials - Nano goes Macro** particularly addresses industry delegates and application-oriented universities and institutes seeking new trends and partners for cooperation activities.

Get more information on the high innovative potential of hybrid materials with nanomaterials and / or submit your own contributions and present your plans and projects as well as your products and solutions at the two-day conference in Nuremberg.

KEY TOPICS / CONTENT

This year, the conference will focus on projects, products and solutions in the areas of lightweight construction, energy storage, construction and processing. Participants will receive:

- Market overview and comprehensible introduction to the topics of nanotechnology and fiber composites
- Information about existing processes, applications and products
- Technical solutions of nanocomposites and fiber-reinforced systems with material improving properties (e.g., conductivity control, higher load capacities, improved mechanical parameters)
- Workshops on corrosion resistance, dispersion techniques, functionalisation, aerospace applications
- Development of future cooperation
- Information about recycling, health and occupational safety

PRESENTATIONS / SHORT PITCHES / WORKSHOPS

Take the chance and present your work / projects and activities at the conference. Contribution including a short abstract (max 2.000 characters) can be submitted by **Monday, 28 June 2019** via e-mail or at hybrid.nanogoesmacro.de

Conference language will be German. Lectures can be held in English.

ACCOMPANYING EXHIBITION

Additionally, material and equipment manufacturers have the opportunity to present demonstrators and products in an accompanying exhibition.

Registration for the accompanying exhibition can be submitted by **Friday, 17 October 2019**.

ADVISORY COMMITTEE

The event is being organised in close cooperation with the advisory body:

- Airbus
- EXAKT Advanced Technologies GmbH
- European Centre for Dispersion Technologies
- LAMILUX - Heinrich Strunz Gruppe
- Technische Hochschule Nürnberg
